Benefits of IPS e.max crowns for patients

- ✓ Restores function to broken teeth. Strengthens teeth that have excessively large fillings.
- ✓ Tooth preparation is minimal and preserves the natural tooth structure.
- ✓ Outstanding lifelike appearance; blends perfectly with neighboring teeth.
- ✓ Bio-compatible.
- ✓ e. Max may be fused to a stronger material to hide dark underlying tooth structure.
- ✓ Milled from solid ingots using CAD/CAM technology for a precise fit.

Considerations

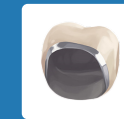

- ✓ Not suitable for bridges.
- ✓ 10 to 15-year average lifespan.
- ✓ Material can be easily fractured – not suitable for patients who have a hard bite or grind their teeth.

You May Be a Candidate for Other Tooth Replacement Alternatives

Cast metal (Gold or Silver) crowns

Porcelain fused-to-metal (PFM) crowns

Zirconia crowns
